Progressive Mobility Consultant Sling Assessment Service

Free up more Time to Care

Delegate the task of having your Sling Assessment (Audit) performed by the expertise of a Progressive Mobility Consultant freeing up more resources for your staff.

Your Progressive Mobility Consultant will inspect your slings for any slings past their lifespan and not in safe working condition, removing them from usage thus decreasing the risk of injury to your caregivers and patients.

An onsite inventory count of all your slings enables your Progressive Mobility Consultant to determine if you have sufficient volume of slings along with the appropriate styles and sizes.

The Sling Assessment Service ensures that all your slings are available, appropriate for the patient, used correctly, and are clean and in good safe working order.

Periodic Inspection according to EN ISO 10535:2006, Guidance for 6-month inspection of slings.
