Disruptive Technology in Safe Patient Handling & Mobility

The GH3+ ceiling lift system Trainer Module, with active assisted therapeutic activity capabilities, makes it possible to start rehabilitation with dynamic weight relief in the patient's room.

Dynamic weight relief

The GH3+ Trainer Module will dynamically unload the patient's body weight up to 220lbs. The caregiver selects the amount of weight needed to be unloaded for the patient and the Trainer module will do the rest. Hands-free for quality in the training!

Time to care
