## GH3+ Ceiling Lift System with Trainer Module

A GH3+ hoist equipped with the Trainer Module is not only a perfect lifting and transferring solution, but it also provides the possibility to start rehabilitation with dynamic weight relief in the patient's room.

The GH3+ Trainer Module will dynamically unload the patient's body weight up to 220lbs. The caregiver selects the amount of weight needed to be unloaded for the patient and the Trainer module will do the rest. Hands-free for quality in the training!

GH3+ Trainer Module demonstration.
