

Guldmann™

GH3+ Ceiling Lift System with CLM Online ^{WiFi}

In real-time and from anywhere you have wi-fi access, view the day and time of lifts, how long transfers are taking and the height and weight of each transfer. Observing lift use and trends provides opportunity for SPHM Program leaders to objectively quantify and establish lift use expectations.

See an overview of when and where safety inspections are due. See detailed information for each individual GH3+ Ceiling Lift and its specifications.
